EXPERIENCE

Attosol Technologies, Kolkata — Software Developer

June 2021 - PRESENT

- Maintained the company's static site single-handedly, using static site generator HUGO.
- Constructed HUGO themes and shortcodes, tweaking with the taxonomies and the content flow of HUGO.
- Created layouts using HTML5, CSS3, and LESS.
- Applied various frameworks, Spectre CSS and Pure CSS for responsive and functional layouts.
- Designed components utilizing JQuery and Javascript, including DOM manipulation and the Javascript object model.
- Delivered functional and class components, perfectly lined up with the organizational requirements, maneuvering through hooks and class-based components.
- Employed life cycle methods, for manipulating and controlling DOM
- Managed the state of the data using the state management tool, REDUX.
- Used RESTful API calls, to fetch data from the server-side and represented on the client-side.
- Implemented various functionalities utilizing AOS, Webpack config for embeddable widgets, Masonary.js, Slick.js and many more.
- Experience with front-end development pipeline, NPM.
- Utilized code versioning tools, Git and SmartGit.
- Almost a year of work experience in agile processes using Scrum methodology.
